

Communication

Date	29 September 2026
Team ID	UNM123APEXLAB
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	1 Mark

Communication Plan:

Effective communication kept the ComicCraft team aligned while building the AI comic generator. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, bugs in story and image generation, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp group / Google Meet	All 5 team members	Share daily progress on story and image generation and plan the day's tasks.
2	Progress Update	Weekly	Google Meet / Google Docs	Team members and project mentor	Review finished modules (FastAPI backend, Gemini integration, web UI) against the plan.
3	Issue / Bug Discussion	As Needed	WhatsApp group / VS Code Live Share	Team members involved in the issue	Debug problems such as API errors or missing images and agree on the fix.
4	Stakeholder Review	Bi-Weekly	Google Meet / Email	Team and mentor / faculty	Demo the prototype and collect feedback on story and image quality.
5	Final Demo Rehearsal	Once	In person / Google Meet	All 5 team members	Practise the end-to-end ComicCraft demo and the presentation flow.
6	Documentation Review	Weekly	Google Docs / Google Drive	All 5 team members	Keep project documents and shared Drive files up to date.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Team members were unsure who owned which module (story, images, UI).	Assigned an owner to each module and tracked tasks in a shared list reviewed in the daily standup.
2	Bugs such as images not showing were reported late or without enough detail.	Members now post the error message and a screenshot in the group chat and discuss it in a quick call.
3	Code and .env settings differed on each member's machine, causing errors.	Shared code through a common repository and one .env.example so everyone uses the same setup.
