

Project Executable Files

Date	29 September 2026
Team ID	UNM123APEXLAB
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
ComicCraft/  
|-- app/  
|   |-- main.py  
|   |-- routes.py  
|   |-- config.py  
|   |-- gemini_flash.py  
|   |-- gemini_pro.py  
|   |-- image_generator.py  
|   |-- layout_builder.py  
|   |-- exporters.py  
|-- templates/  
|   |-- index.html  
|   |-- comic_preview.html  
|   |-- export_success.html  
|-- static/  
|   |-- panels/  
|   |-- exports/  
|-- .env  
|-- .env.example  
|-- requirements.txt
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://github.com/25bcs032-hash/comic-craft-project
Login Credentials (Demo)	Username: 25bc032_hash
Platform / Hosting Provider	Canvas
Repository Link	https://github.com/25bcs032-hash/comic-craft-project
Demo Video Link	https://drive.google.com/file/d/1TqswMjmrQPOa6PoUMnbhRfGrCvJ-B0v4/view?usp=drivesdk

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:
Python 3.10+, pip, Git, Windows PowerShell; Gemini API key and Hugging Face token.

Step 1: Clone the repository and open the project folder:
git clone https://github.com/25bcs032-hash/comic-craft-project

Step 2: Create a virtual environment: python -m venv venv

Step 3: Activate it: venv\Scripts\activate (or env\Scripts\activate if named env)
Expected prompt: (venv) PS C:\...\ComicCraft>

Step 4: Install dependencies: pip install -r requirements.txt

Step 5: Create a .env file in the project root (do not upload it to GitHub):
GEMINI_API_KEY=your_actual_gemini_key
HF_API_KEY=your_actual_huggingface_token

Step 6: Start the FastAPI server:
python -m uvicorn app.main:app --reload --log-level debug
Expected: Uvicorn running on http://127.0.0.1:8000

Step 7: Open http://127.0.0.1:8000 in the browser.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Image generation is slow on CPU and the first run downloads large Stable Diffusion model files.	Use a GPU if available and keep the panel count low (4-6). Allow extra time on first run.
2	Gemini API free-tier rate limits or quota errors can interrupt story generation.	Wait and retry, or use an API key with higher quota.
3	Character appearance and style may vary slightly between panels.	Consistent style keywords and character description are reused in every prompt. Open limitation.
